<sup>1</sup> Although Pre-Disturbance Surveys are deemed practical for these species, continuing pre-disturbance surveys is not necessary in order to meet management objectives.	
<sup>2</sup> For these species, until Management Recommendations are written, the following language will be considered part of the Management Recommendation: "Known and newly discovered sites of these species will be protected from grazing by all practical steps to ensure that the local population of the species will not be impacted."	
FOOTNOTES (continued)	
<sup>3</sup> For these species, until Management Recommendations are written, the language "known and newly discovered sites of these species will be protected from grazing by all practical steps to ensure that the local population of the species will not be impacted" is the Management Recommendation and no other recommendations are imposed at this time.	
<sup>4</sup> Based upon direction contained in the ROD, equivalent-effort pre-disturbance surveys are required for these eight mollusk species.	
<sup>5</sup> Based upon direction contained in the ROD, this mollusk species requires management of sites known as of 9/30/99.
